DL-EASTLAND began producing paper cat litter in 2018. Advanced equipment production line, the use of scientific production technology, has a perfect R & D testing department, can produce 10,000 tons of products per month. The price comparison is cheaper, the advantage is obvious.

Our company has perfect supply chain management, to solve all problems such as packaging design, product selection, logistics and transportation. It has been recognized by dealers and cat families and sold to Japan, Egypt, South Korea and other countries

Hs code : 38249999

Appearance : Cylinder shape

Diameter : 4 mm (according to clients)

Length : 1-2mm

Color : Cream,

Fragrance : Natural,

Main Material : Paper powder, water absorbent and agglomerant

Dust : 99% Free

Moisture : About 15%

Water absorption capacity UP UP!!!

Cat litter 50g + Water 250ml = Fully Absorbed

Feature: Naturally degradable

1. The raw material is made of recycled paper, which is environmentally friendly and degradable.
2. Clean. Cleaner indoor hygiene allows cats to avoid breathing dust.
3. Fine particle size, compared with the natural environment, not stick to the claw, not stick to the body.
4. Fast water absorption, not easy to stick to the bottom.
5. It's cheap.

Paper cat litter usage:

1. In a clean litter box, add 6-8cm of paper litter
2. Clean the litter box 1-2 times a day to keep it clean
3. Add fresh, clean litter in time to ensure adequate sand
4. Thoroughly change the sand and clean and disinfect the litter box every month

Factory introduction and Packaging:

Product diversification, process intimacy, process modernization
