Not using cat litter

With a small amount of
water quickly unite

Multiple times of water
immersion, quick
dissolution

Advantage :

- * 3mm coarse particles
- * No sticking to the meat pad
- * No taking out of the pot

- * Plant raw material,
- * Bean curd residue raw material
- * Fully degradable,

- Place a litter bag in a clean litter box, place a urinal over it, and place a layer of Tofu cat litter about 4 cm (1.5 in) thick.
- If there are multiple cats, it is recommended to shorten the litter replacement cycle proportionally rather than putting too much litter in the litter box.
- 1.5kg /3.8L/ bag litter: one cat, one month; Two cats, about 15 days; Three cats, about 10 days.
- When the litter box is saturated with litter, wrap the litter bag around the urinal and clean it with the crystal litter. Replace trash bags, pet urinals, and crystal litter.
- It is recommended to place the litter box in a dry and ventilated place.
