***We are the best bentonite irregular cat litter manufacturer.***

- \* DL-EASTLAND has been producing broken cat litter (natural ore cat litter) for 15 years, with a monthly output of 20,000 tons,
- \* The price is cheaper and the advantage is obvious.
- \* It has been recognized by dealers and cat owners, and sold to more than 30 countries including the United States, Canada, Brazil, Colombia, Indonesia, Vietnam, Saudi Arabia, Bahrain, Egypt, and South Korea.

## *About our product :*

Irregular bentonite cat litter (natural ore cat litter) is made of high-quality sodium bentonite from Inner Mongolia ore, rich in NAt elements.

The activated mineral porous medium adsorbs the ammonia nitrogen odor molecules in the urine, and the deodorization effect is good. Broken cat litter (natural ore cat litter) is a pure natural bentonite ore cat litter without any additives, with fine particle size, which is comparable to the desert environment and is in line with cats' preferences.

**1. Natural ore catsand.**

Physical crushing of raw ore, without any added bentonite ore catsand.

**2. Clean.**

Dust content is less than 0.05%. After 8 steps to clean up the dust process, so as to ensure that the product is dust-free

**3. Fine particle size.**

1-2mm, comparable to the desert environment, not stick to the claw, not stick to the body.

**4. Fast water absorption.**

Instant water absorption of 2 seconds like sponge quickly clumping.

**5. The agglomeration strength is large.**

**6. Good taste control effect.**

Natural bentonite particles + activated carbon particles + deodorant factor, triple adsorption, deep lock and decomposition of odor.

**7. Strong antibacterial.**

# *Absorption ability & Clumping Test*

Falling from  
a high place  
more than  
one meter,  
it still clumps  
together.

**Hs code :** 3824999999

**Size :** 0.5-4mm

**Fragrance :** Natural

**Absorption:** > 350%

**Agglomerate strength :**

> 15cm High place free fall three times without breaking

**Agglomeration compressive strength :** > 950g

**Agglomeration :** 60g-90g, The agglomeration is elliptical or oblate.

**Appearance :** Irregular Crush

**Color :** Grayish white or Brown

**Dust:** < 1%

**PH:** 8.5-10

## ***The use of bamboo charcoal cat litter :***

1. In a clean cat litter box, add 6-8cm thick cat litter
2. Clean up 1-2 times a day to keep the litter box clean and hygienic
3. Add clean new cat litter in time to ensure sufficient sand
4. Completely change the sand every month and clean and disinfect the cat litter box
