## ***We are the best cat litter manufacturer.***

DL-EASTLAND has been producing tofu and bentonite mixed cat litter for 3 years ,with a monthly output of up to 10,000 tons.Inexpensive, with obvious advantages.

Recognized by dealers and cat families, the products are exported to more than 30 countries such as the United States, Canada, Brazil, Colombia, Indonesia, Vietnam, Saudi Arabia, Bahrain, Egypt, South Korea and so on.

## Customized production

- Tofu cat litter is made from natural plants: bean dregs and corn starch. Diameter 1.5, 2.0, 3.0mm.
- Bentonite spherical sand is made by physical crushing of Inner Mongolia sodium bentonite ore. Rich in NA+. Particle uniformity in 1-3.5mm.
- Or use the best broken cat litter (natural mineral cat litter). Particles evenly in 1-2mm. Broken cat litter (natural ore cat litter) is pure natural bentonite ore cat litter without any addition, fine granularity, compared to the desert environment, in line with the cat's preference.
  
- The following can be customized according to customer's request
- Add activated carbon particles to effectively purify the air.
- Add deodorant to deeply lock and break down odors.
- Product packaging: 2.5kg, 5kg and 10kg.

# Tofu bentonite mixed cat litter (70% tofu cat litter + 30% bentonite cat litter)

**Hs code:** 38249999

**Diameter:** 1.5mm/2mm/3mm (according to clients)

# You might focus on

*Absorb fast! Solidarity! Strong deodorant !*

- **Raw materials are made of natural plants and minerals.**  
Which are environmentally friendly and degradable.
- **Safety and health.**  
No chemical additives, suitable for cats.
- **Tight particles.**  
Compared with the natural environment, not stick to the claw, not stick to the body
- **Dust-free.**  
Make indoor hygiene cleaner, so that cats avoid respiratory dust.

# Feature

- **Fast water absorption.**  
Instant water absorption of 2 seconds like sponge, fast agglomeration, non-sticking bottom. Adsorption force of 10G can absorb 50G of water.
- **The agglomeration strength is large.**  
The diameter of cone agglomeration is less than 5CM, and the height is less than 6CM. It is not strong to fall freely from a height of 1m.
- **Strong deodorization and strong taste absorption.**

## ***The use of Tofu bentonite mixed cat litter:***

1. In a clean cat litter box, add 6-8cm thick cat litter
2. Clean up 1-2 times a day to keep the litter box clean and hygienic
3. Add clean new cat litter in time to ensure sufficient sand
4. Completely change the sand every month and clean and disinfect the cat litter box
